

Design your own Snazzy Seascape

You will need:

Scissors and pins

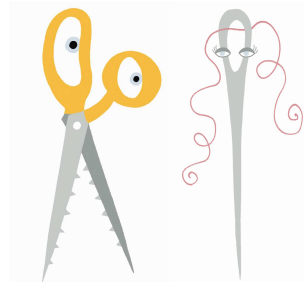

Needle and thread

Fabric glue

Piece of calico for backing (30cm X 30cm approx)

Lots of assorted fabrics—cottons, netting, felt

Ribbon, lace, beads and sequins for decoration

You can either sew or use glue for this project

Tip: You may wish to design your seascape on paper first and cut out templates.

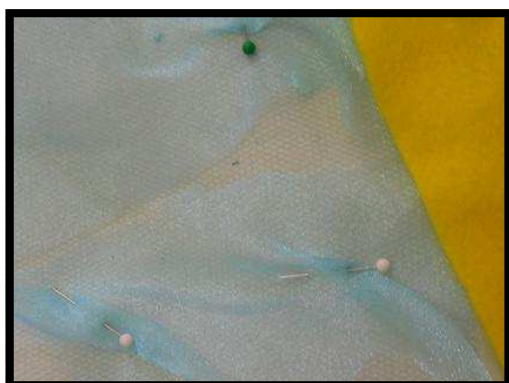

1. Choose your background fabrics and cut them to size.

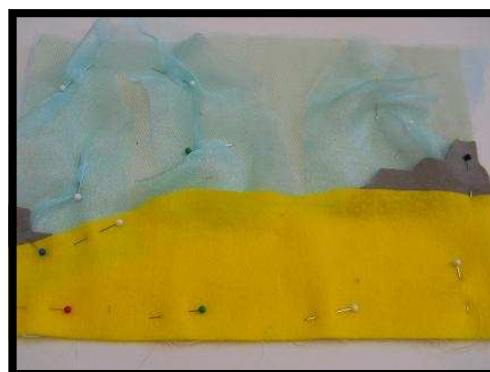

2. Pin the fabrics to the calico, then you can either glue or sew the pieces in place.

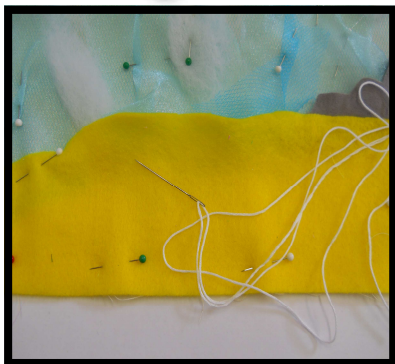

3. You may like to use netting for the sea and create 'waves' by pinning it loosely to the calico.

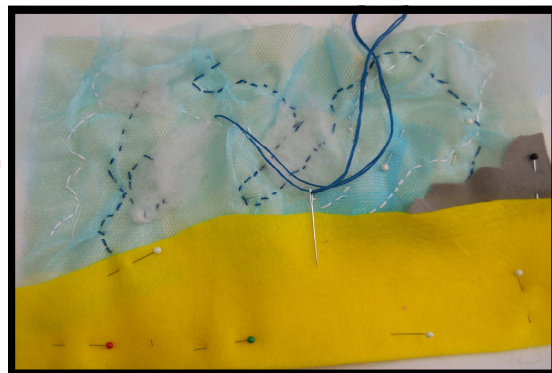

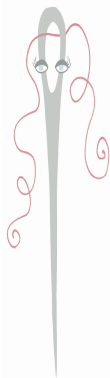

4. Add detail with more layers of fabric, e.g. we have added grey felt to be cliffs.

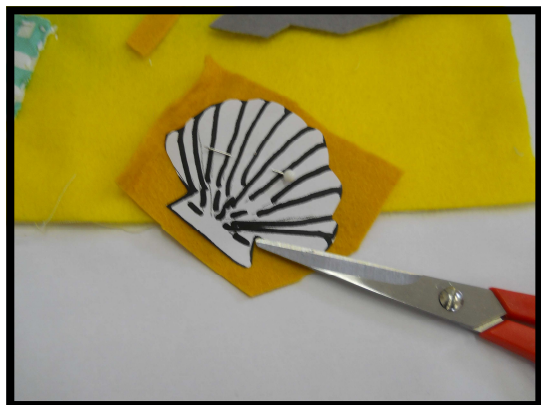

5. Stitch or glue you pieces in place. **Tip:** Use decorative stitch in blue and white thread to create 'waves' in your sea.

6. Add detail to your design—our seascape has an umbrella which we made by using a paper template to help cut out the shape from the fabric.

7. You could add a shell in yellow fabric or even a deck chair in stripy fabric.

8. Keep adding detail until you are happy with your very own seascape!

Happy Holidays!

Another example of a seascape:

You could use felt to make beach houses in different colours!
